

Resin Flow Canal CS/FC43

Item number: 02202 00005

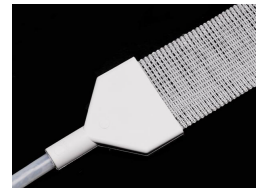

Technical data

Description

This product is composed of a knitted structure and monofilament-created nooses which are used as flow canal. The tape supports the vacuum infusion process (VAP®). It can be used either at the entry side of the resin infusion aid or at the exit side to evacuate the air and excessive resin. The flow canal is easy to handle and to attach, adapts to curved component contours and leaves no appreciable marks.

A adapter is available and can be used as connection between the resin or vacuum hose and the resin flow canal. The adapter simplifies the hose connection.

Adapter CS/AD43

Item number: 02203 00001

Raw materials 100 % Polyester

Construction Knitted fabric

Packaging Roll of 25 lin m

Weight 25,8 gram/lin m

Further details Width: 43 mm

Thickness: 3,5 mm

Storage temp.: +5 °C to +50 °C ¹⁾

¹⁾ Avoid direct sun irradiation.

The values presented in this data sheet are typical values and are not to be interpreted as product specifications.

The purchaser is not released from the obligation to inspect the incoming goods. Findings do not indicate the suitability of the product for a concrete application.
