

A3000E Breather fabric

Item number: 02451 00002

Technical data

Description The **breather fabric A3000E** is ideally suited to ambient and high temperature applications.

Features

- Medium weight polyester breather fabric with excellent all round stretch and drapeability.
- Excellent multi-directional stretch for use with complex shape components.
- Can be used effectively in single or multiple layers.

Product variants

- Also available in grey.
- Also available in synthetic fibres (viscose).

Product	Breather fabric A3000E	Width: 1,52 m	Roll length: 100 lin m
----------------	------------------------	---------------	------------------------

Properties	Characteristics
Maximum use temperature	204 °C
Colour	White
Fibre	Polyester
Weight	150 gms/m ²

A3000E has no release characteristics and should be separated from the laminate by a suitable porous release fabric or film. A3000E is not intended to be used as a breather material alone in high pressure autoclave cures.

Ideal storage condition: No special storage conditions required.

The values presented in this data sheet are typical values and are not to be interpreted as product specifications. The purchaser is not released from the obligation to inspect the incoming goods. Test findings do not indicate the suitability of the product for a concrete application.
