

Resin Flow Channel CS/FC43 SA

Item number: 02202 00006

Width: 43 mm / self-adhesive

Technical data

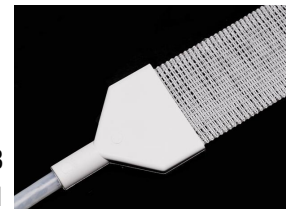

Description

This resin channel is a mesh knitted out of PES monofilaments.

The resulting stripe can be used in a VAP® infusion to accomplish an improved distribution of the resin on the inlet side. In addition to this, it can be placed on the vacuum pump side to evacuate air or any excess resin.

The resin channel is extremely easy to use: thanks to the double-sided adhesive tape on its back, it can be quickly placed and secured into position. The flow channel can be easily draped along curved component contours and leaves a negligible imprint on the part.

A adapter is available and can be used as connection between the resin or vacuum hose and the resin flow channel. The adapter simplifies the hose connection:

Adapter CS/AD43

Item number: 02203 00001

Raw materials 87 % PES 13 % PAN

Construction Knitted fabric Double-sided adhesive tape on the back surface

Packaging Roll of 25 lin m

Max. processing temperature 200 °C

Further details **Width: 43 mm** Thickness: 3,5 mm

Weight: 25,8 gram/lin m *(without adhesive tape)*

Storage: - Avoid direct sun irradiation
- Storage temp.: +5 °C to +50 °C
