

Flash Tape 6325

Item number: 02601 00014

Technical data

Description The adhesive tape **6325** is ideally suited to high temperature applications up to **426 °C**.

Features and Benefits

- Pressure sensitive tape comprising polyimide film with a high temperature fully cured silicone adhesive.
- Unique mechanical properties make these tapes ideal for high temperature laminate processing.
- Solvent resistant acrylic adhesive is also available for lower temperature applications.

Three thickness versions available:

→ 64 µm [0.0025"] → 89 µm [0.0035"] → 128 µm [0.005"]

Product	Thickness: 64 µm	Width: 50 mm	Roll length: 33 lin m
Backing Type	Polyimide		
Total- /Backing Thickness	64 / 25 [µm]		
Adhesive System	Silicone		
Elongation at Break	50 [%]		
Max. Temperature	426 [°C]		
Colour	Amber		

Available width: 25 mm and 50 mm

Packaging unit: 16 rolls

STORAGE

No special storage conditions.

HEALTH & SAFETY

Please refer to the product MSDS for safe handling, personal protective equipment recommendations and disposal considerations.
